House: 41, 51

Projected Start Date:

TO BE DETERMINED

Road Construction

This project is currently in litigation. Final design will commence as soon as litigation resolved. The project will be constructed under a design-build contract with the goal of increasing traffic capacity and improving safety in the project area. Two additional lanes and a center turn lane will be added to the existing roadway cross-section on 11400 South. Other major components of the project include a new interchange at I-15 and 11400 South, a grade separated railroad crossing and a new crossing at the Jordan River. New traffic signals, sidewalks and bike lanes will also be added. Construction is anticipated to take two construction seasons.

A Public Information Manager (PIM) will be hired for this project as it moves toward construction. The PIM will work with local residents, businesses and commuters to provide timely communication about the project, and to troubleshoot stakeholder issues connected with construction.

Current Identified Budget: \$135 million

NOTE: Schedule information listed above is estimated and could change without notice based on funding, scheduling constraints, stakeholder issues, and other unanticipated project elements.

Municipality (ies): Sandy City, South Jordan, Draper, near Riverton

Take care of what we have • Make the system work better • Improve safety • Increase capacity
